Office Action Summary	Application No. 10/578,608	Applicant(s) SO, JAE SEOK	
	Examiner Jena A. Sold	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because reference character 402 in Figure 7 is not discussed in the specification and reference character 401 is mistakenly discussed as designating both the front and rear parts of the sunshade in Figure 7 (column 4, lines 1-4). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

2. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.
3. The abstract of the disclosure is objected to because the problem/solution format of the PCT abstract discusses the problems within the existing art as well as the purported merits and improvements of the present invention. Correction is required.
See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Gore (U.S. 6138279). Gore discloses a visor insert for a visor cap and the methods of manufacture wherein visor insert 6, present applicant's sunshade, is made of a thermoplastic resin material (column 2, lines 64-65), present applicant's plastic, which is then flexed to a desired shape and then heated in a jig set or mold (column 3, lines 13-32). As visible in Figures 3 and 4, the desired shape of the visor insert may be an arc form 8, present applicant's "smoothly curved surface bent like a circular arc," or an inverted V-form 10, present applicant's "angularly curved shape" (column 3, lines 13-14). After the insert is molded and cooled, visor insert 6 is inserted into the pocket for of

hat H or positioned between the top ply TP and bottom ply BP and sewn together to form the complete visor or bill B (column 3, lines 49-57), thus anticipating the attachment of said sunshade to a hat or sun visor cap.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and is cited on form 892 enclosed herewith.
